Animal Planet's definitive atlas of animal life takes readers on a continent-by-continent and habitat-by-habitat passport to adventure! Meet fierce snow leopards in the Tibetan mountains, giant helicopter damselflies in the rain forests of Central America, majestic eagles in the temperate forests of North America, and hundreds more fascinating creatures. What is a habitat? How is the North Pole's animal life different from the South Pole's? How and why do animals adapt to their environment? Is a food web different from a food chain? Animal Planet Animal Atlas answers all these questions and more in a kid-friendly, accessible format that young readers, parents, teachers, and librarians will adore. Through illustrated maps of every continent and its major biomes, full-color photographs of more than 200 animals, and illustrated animal travel guides presenting fun animal trivia, readers can track their favorite animals across the globe while learning about how animal habitats are affected by climate, food and water availability, migration, and human environmental impact. Additional special features throughout the book point out ways in which many animals on our planet share characteristics or behaviors with humans. "ROAR" sidebars discuss

This stunning new atlas is your first-class pass on a world tour of the homes of Earth's most incredible animals. The latest exciting title in DK's popular What's Where on Earth? series maps out the habitats of the world's mammals, fish, birds, reptiles, invertebrates, and more. Whether it's plotting the range of a lion, following the flight paths of birds, tracking great white sharks in the oceans, or exploring the migration of the monarch butterfly, you will see exactly where and how more than 100 extraordinary animal species live. What makes What's Where on Earth? Animals unique are the maps themselves. Each one is individually commissioned in 3-D, with detail to show the habitat of each animal, as well as its geographic location. This reveals an astonishing amount of information about the behavior of these animals, from how seals are adapted to survive in freezing Antarctic seas to how beetles survive in the heat of the Sahara desert. There is also a focus on the conservation and protection of animals. Maps reveal the shrinking territories of some species, showing where they used to roam in the past compared to what's left of their range today. Whichever animal you're trying to track down, you're sure to find it in What's Where on Earth? Animals.

Open up this super-sized atlas and prepare to be immersed in the beauty of our natural world!
