What 's hiding in the woods? Here is the definitive account of today 's nationwide sightings of upright, canine creatures – which resemble traditional werewolves – and a thorough exploration of the nature and possible origins of the mysterious beast. “ She has the ability to send chills up and down your spine. ” —Brad Steiger, author of *Real Ghosts*, *Restless Spirits*, and *Haunted Places* “ If you thought the likes of *The Wolfman*, *The Twilight Saga: Eclipse*, and *Underworld* had no basis in fact, it's time to think again! ” —Nick Redfern, author of *There's Something in the Woods* “ *Real Wolfmen* is a riveting work of amazing scope and depth. You ' ll be hooked from the first page. ” --Rosemary Ellen Guiley, author of *The Encyclopedia of Vampires and Werewolves* The U.S. has been invaded – if many dozens of eyewitnesses are to be believed – by upright, canine creatures that look like traditional werewolves and act as if they own our woods, fields, and highways. Sightings from coast to coast dating back to the 1930s compel us to ask exactly what these beasts are, and what they want. Researcher, author and newspaper reporter Linda S. Godfrey has been tracking the manwolf since the early 1990. In *Real Wolfmen* she presents the only large-scale cataloguing and investigation of reports of modern sightings of anomalous, upright canids. First-person accounts from Godfrey ' s witnesses – who have encountered these creatures everywhere from outside their car windows to face-to-face on a late night stroll – describe the same human-sized canines: They are able

to walk upright and hold food in their paws, interact fearlessly with humans, and suddenly and mysteriously disappear. Godfrey explores the most compelling cases from the modern history of such sightings, along with the latest reports, and undertakes a thorough exploration of the nature and possible origins of the creature.

Reconnect with the natural world using the magick of the five elements of earth, air, water, fire, and spirit—written by one of the grand dames of witchcraft and magick. For more than a thousand years, alchemists and magicians have worked with the four elements of the universe. While most spiritual seekers have a basic knowledge of these four elements, and the more nebulous fifth element, spirit, few realize that the energies of the elements are a key to their magical practice. Elemental Magick offers readers insight into the inner teachings of the elements. Author D. J. Conway explains in depth the forces behind the elements and how they provide a framework for literally everything in the universe. She also explains the all-important and powerful element of spirit that belongs to each of the other elements and how these intimate connections allow the magickal energy to flow in a continuous circle of existence. By learning how to work with and balance the elements and their spirits, readers will better understand the larger process of balancing one ' s life with the world around them.

Spotlighting news articles, historical accounts, and firstperson interviews, this chronicle of human interactions with monsters will convince even the most hardened skeptic of the existence of the bogeyman,

bigfoot, werewolves, and swamp creatures. Offering an array of wild reports—from the police officer who begrudgingly responded to a call about a longhaired woman flying over a suburban neighborhood only to find himself calling for backup when she attacked his patrol car to the motorist whose headlights illuminated a sevenfoot tall, wolflike creature that stood on its hind legs—this historical record highlights scary and unbelievable narratives. From slightly demented humans to spine-tingling paranormal encounters, each outlandish occurrence is detailed with thorough research and recounted with a storyteller's crafted voice.
