The Command of the Air is the greatest military treatise on air war ever written – a dogmatic manifesto promising victory through strategic bombing. Giulio Douhet (1869-1930), air war's greatest prophet, ought to have been a First World War fighter ace. In fact, he may never have learnt to fly. He was an army officer, reaching the rank of general, but trench-war stalemate had turned his mind to alternatives.

The air force that could achieve command of the air by bombing the enemy air arm into extinction would doom its enemy to perpetual bombardment. Command of the air meant victory. Douhet believed in the morale effects of bombing. Air power could break a people's will by destroying a country's "vital centers".

### The Command of The Air by Giulio Douhet, Paperback ...

The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

The Italian General Giulio Douhet reigns as one of the twentieth century's foremost strategic air power theorists. As such scholars as Raymond Flugel have pointed out, Douhet's theories were crucial at a pivotal pre-World War II Army Air Force institution, the Air Corps Tactical School.

test our understanding, find the assumptions and conclusions of Douhet that proved false, and read with wonder those that proved true. Some of what he wrote today seems almost timeless, 'principles' perhaps of the employment of aircraft in war. Giulio Douhet was a prophet. From the perspective of today, he still bears pondering. Serious thinking about the nature of war and the role of aerospace power will not in our lifetime cease to be of value." -- Abstract.

Always at War is the story of Strategic Air Command (SAC) during the early decades of the Cold War. More than a simple history, it describes how an organization dominated by experienced World War II airmen developed a unique culture that thrives to this day. Strategic Air Command was created because of the Air Force's internal beliefs, but the organization evolved as it responded to the external environment created by the Cold War. In the aftermath of World War II and the creation of an independent air service, the Air Force formed SAC because of a belief in the military potential of strategic bombing centralized under one commander. As the Cold War intensified, so did SAC's mission. In order to prepare SAC's "warriors" to daily fight an enemy they did not see, as well as to handle the world's most dangerous arsenal, the command, led by General Curtis LeMay, emphasized security, personal responsibility, and competition among the command. Its resources, political influence, and manning grew as did its "culture" until reaching its peak during the Cuban Missile Crisis. SAC became synonymous with the Cold War and its culture forever changed the Air Force as well as those who served.
