Composer, Béla Bartók is internationally renowned as one of the most important and influential musicians of the twentieth century. Throughout his life he wrote lectures and essays that dealt with virtually every aspect of European music. These essays, previously scattered in specialized journals, deal with the wide range of interests and expertise: folk music and musical folklore, the music of his contemporaries and great predecessors, a brief autobiography, the structure and performance of his own music, the sale of sound recordings, and music education.

Divided by region and subregion, this volume examines the indigenous music of different countries,

Music spectacle anywhere in the world, the Eurovision Song Contest -- Philip V. Bohlman reveals the ways in which music and nationalism intersect in the shaping of the New Europe. Focus: Music, Nationalism, and the Making of the New Europe begins with the emergence of the European nation-state in the Middle Ages and extends across long periods during which Europe's nations used music to compete for land and language, and to expand the colonial reach of Europe to the entire world. Bohlman contrasts the "national" and the "nationalist" in music, examining the ways in which their impact on society can be positive and negative -- beneficial for European cultural policy and dangerous in times when many European borders are

more fragile than ever. The New Europe of the twenty-first century is more varied, more complex, and more politically volatile than ever, and its music resonates fully with these transformations.

This edition presents sixty-four Jewish folk songs transcribed between 1899 and the 1930s by the Latvian ethnomusicologist Emilis Melngailis (1874–1954). Drawing on manuscript sources and other archival material, it makes available, for the first time in print, a broad selection of Jewish vernacular music performed in the territory of present-day Latvia and Lithuania in the decades preceding World War II. Accompanying essays introduce

Melngailis and his collecting project, situating his work within the context of contemporary discourses on Jewish and Latvian folk song, nation, and identity as they coalesced in Riga, St. Petersburg, and German-speaking Mitteleuropa in the early twentieth century.

In the 1960s, within the larger context of the civil rights movement and the burgeoning counterculture, the blues changed from black to white in its production and reception, as audiences became increasingly white. Yet, while this was happening, blackness-especially black masculinity-remained a marker of authenticity. Blues Music in the Sixties discusses these developments, including the

International aspects of the blues. It highlights the performers and venues that represented changing racial politics and addresses the impact and involvement of audiences and cultural brokers.

Song and dance style--viewed as nonverbal communications about culture--are here related to social structure and cultural history. Patterns of performance, theme, text and movement are analyzed in large samples of films and recordings from the whole range of human culture, according to the methods explained in this volume. Cantometrics, which means song as a measure of man, finds that traditions of singing trace the main historic distributions of human

collection! Tribune For over seventy years, the Communist Party of Great Britain had an extraordinary impact on British cultural life, exercising an influence quite out of proportion to its size or political importance. Many art forms were revitalised, others profoundly changed, new ones established or shaped by groups and individuals associated with the party, who brought to the realm of cultural production - whether in music, film, theatre or literature - a dynamism and vision that helped to lay the foundations for a new radical culture, a progressive avant garde in which the struggle was always to produce a culture for and of the people, in the front line of the battle of ideas. The distinguished
