This book provides a comprehensive account of fiber-optic communication systems. The 3rd edition of this book is used worldwide as a textbook in many universities. This 4th edition incorporates recent advances that have occurred, in particular two new chapters. One deals with the advanced modulation formats (such as DPSK, QPSK, and QAM) that are increasingly being used for improving spectral ...

Fiber-Optic Communications Systems, Third Edition. Govind ...
Modern fiber-optic communication systems generally include an
optical transmitter to convert an electrical signal into an optical signal
to send through the optical fiber, a cable containing bundles of
multiple optical fibers that is routed through underground conduits
and buildings, multiple kinds of amplifiers, and an optical receiver to
recover the signal as an electrical signal.
