This book provides an intimate and affectionate view of one of Hollywood's most admired directors. The fifty-year career of John Ford (1895-1973) included six Academy Awards, four New York Film Critics' Awards, and some of our most memorable films, among them *The Informer* (1934), *The Grapes of Wrath* (1940), *The Quiet Man* (1952), *The Long Gray Line* (1955), and *The Wings of Eagles* (1957). In addition, the name John Ford was practically synonymous with the great Westerns that came out of Hollywood for many years-- *Stagecoach* (1939), *She Wore a Yellow Ribbon* (1949), *Rio Grande* (1950), *The Searchers* (1956), and *The Man Who Shot Liberty Valance* (1962), for example. After his death a European newspaper mourned Ford as "the creator of the Western," although many of his finest films were far removed from that genre. Combining interviews with John Ford with his own reflections, director Peter Bogdanovich captures both the artist and the man in a highly readable, compact book that will please film lovers and Ford admirers alike. Over a hundred stills are included, along with the most completed filmography yet compiled for John Ford.

The Ford Bronco is a sport utility vehicle that was produced from 1966 to 1996, with five distinct generations. The Bronco permanently entered American popular culture on June 17, 1994, when a white 1992 model owned and driven by Al Cowlings with O. J. Simpson, who was wanted for the murders of his ex-wife and her friend, attempted to elude the Los Angeles Police Department in a low-speed chase, which was nationally televised and viewed by millions nationwide. This is complete story from conception through discontinuation in 1996, told by historian (and well-known "Ford guy") Paul McLaughlin utilizing his large collection of photographs, brochures, ads and other promotional material. Follow the Bronco's various incarnations from a small sport utility vehicle of the 1960s and 1970s into the larger full-size Bronco of the 1980s and 1990s, special models like the "Bill Stroppe Edition", "Eddie Bauer Specials", the Bronco II and other juicy tidbits like the Bronco concept vehicle that Ford took on the car show circuit in 2005 (which got Bronco enthusiasts so excited that Ford was going to add a Bronco vehicle to their lineup once again). Also covered are the Broncos that were raced in off-road desert racing, Bronco toys and other collectibles, specification sheets, production numbers, and other interesting facts. Finally, a book for all Bronco enthusiasts!

Scores of talented and dedicated people serve the forensic science community, performing vitally

important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
