Online Library History Of Beekeeping In Britain

Sales of honey have dropped for the first time in six years, as British bee colonies continued to decline due to colony collapse disorder and bad weather. Figures from the British Beekeepers Association revealed that nearly a third of hives failed to survive the winter of 2007 while a fifth of the UK's colonies were lost in 2008.

skep allowed the bees to come and go, and the comb was laid down inside.

~~The History of Beekeeping — The History of Beekeeping ...~~

Beekeeping (or apiculture) is the maintenance of bee colonies, commonly in man-made hives, by humans. Most such bees are honey bees in the genus *Apis*, but other honey-producing bees such as *Melipona* stingless bees are also kept. A beekeeper (or apiarist) keeps bees in order to collect their honey and other products that the hive produce (including beeswax, propolis, flower pollen, bee pollen

paper deals with beekeeping from the twelfth to nineteenth centuries. In England and the rest of Europe, the honeybee kept in hives is *Apis mellifera* L. The bees collect nectar and pollen from flowers.

~~The History of Beekeeping in English Gardens~~
Beekeeping in hives was probably introduced into the United Kingdom from continental Europe and spread from east to west. Hive beekeeping was well established before the Roman invasion of Britain in AD 43.
