A charming portrait of one man's dreams and schemes, by "the greatest Italian writer of the twentieth century" (The Guardian). In this enchanting book of linked stories, Italo Calvino charts the disastrous schemes of an Italian peasant, an unskilled worker in a drab northern industrial city in the 1950s and '60s, struggling to reconcile his old country habits with his current urban life. Marcovaldo has a practiced eye for spotting natural beauty and an unquenchable longing for the unspoiled rural world of his imagination. Much to the continuing puzzlement of his wife, his children, his boss, and his neighbors, he chases his dreams and gives rein to his fantasies, whether it's sleeping in the great outdoors on a park bench, following a stray cat, or trying to catch wasps. Unfortunately, the results are never quite what he anticipates. Spanning from the 1950s to the 1960s, the twenty stories in Marcovaldo are alternately comic and melancholy, farce and fantasy. Throughout, Calvino's unassuming masterpiece "conveys the sensuous, tangible qualities of life" (The New York Times).

The anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.

This book is about innovation, reflection and inclusion. Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing their experiences while appropriating common goods content. We are talking of public spaces such as universities, academies, libraries, museums, science-centres, but also of any place in which co-creation activities may occur. The argument starts with the need for new narratives in the history of philosophy, which can be established through co-creation, the motor of cultural innovation. The result is redefining the history of philosophy in terms of a dialogical civilization by ensuring continuous translations, individual processes of reflection and collective processes of inclusion. Readers will grasp the effectiveness of the history of philosophy in societies that are inclusive, innovative and reflective.

This book examines immigrant student achievement and education policy across a range of Western nations. It is divided into 3 sections: Part 1 introduces the topic of immigrant student achievement and the performance disadvantage that is consistently reported across a range of international jurisdictions. Part 2 then presents national profiles from scholars in ten countries (England, Germany, Italy, Sweden, Finland, Netherlands, Republic of Ireland, Canada, Australia, and New Zealand). These educational jurisdictions were selected because they represent a range of Western nations engaged in large-scale reform efforts geared towards enhancing their immigrant students' achievement. Each of the national profiles provides a brief overview of the evolution of the cultural composition of their respective school-aged student population; explains the trajectory of achievement results in non-immigrant and immigrant student groups in relation to both national and international large-scale assessment measures; and discusses the effectiveness of policy responses that have been adopted to close the achievement gap between non-immigrant and immigrant student populations. It also examines the relationships between education policies and immigrant student achievement and discusses how education policies have evolved across various cultural contexts. In conclusion, Part 3 analyzes cross-cultural approaches designed to address the performance disadvantage of immigrant students and proposes future areas of inquiry stemming from the national profiles. The book offers insights into a diverse cross-section of nations and policy approaches to addressing the performance disadvantage.

This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.
