and the role of certification, and Advancing Workplace-Based Assessment in Psychiatric Education: Key Design and Implementation Issues.

This issue details the latest knowledge of early diagnosis, risk factors, limited surgical treatments, and novel therapies for pancreatic diseases. Clinicians will learn the most prognostic scoring systems for acute pancreatitis, review the basics for early management of the disease, and see how current practice guidelines have evolved. Advances in radiological imaging when applied to the pancreas have resulted in enhanced staging and improved selection for surgical intervention. Endoscopy of the pancreas via both ERCP

Read Online On Penguin Clics

and endoscopic ultrasound has led to unprecedented access and potential for non-operative intervention. Pancreatic surgery now takes advantage of both minimally invasive approaches and techniques learned from organ transplantation. These latest advances are addressed in this issue by key opinion leaders.

The busy exotic animal practitioner will find this unique issue packed with useful, practical information on the exotic animal pediatrics. The majority of the issue will cover anesthesia, nutrition, chiropracty, and pediatrics in psittacines, reptiles, fish, exotic hoofstock and small mammals.

- Presents the positive results of the author ' s two-year clinical trial of spiritual healing (energy medicine) involving 200 hospital patients
- Shares intriguing evidence from case studies as well as other research projects that negate the myth that energy healing is only a placebo
- Explores how spiritual healing not only led to improved outcomes for patients, but also faster recovery times and thus less time spent in hospitals

Seven years after qualifying to become a spiritual healer, Sandy Edwards approached a consultant gastroenterologist at a city hospital and offered to give healing to his patients as a volunteer. She provided healing sessions alongside conventional medical treatments, documenting the effects in a

Read Online On Penguin Clics

scientific way, and the doctor was surprised at the overwhelmingly positive outcomes. In partnership with the University of Birmingham, as well as a national grant to fund the study, Sandy instigated the largest clinical research trial of spiritual healing in the world. Revealing the outstanding results of this two-year medical trial, which involved 200 chronically ill hospital patients, Sandy demonstrates that spiritual healing (energy medicine) can support the healing process of a patient, whether they are in pain, sick, stressed, or depressed. In many cases, these patients had been suffering for a long time with little hope of recovery. Yet they improved substantially in numerous ways after receiving just five 20-minute healing sessions.

Read Online On Penguin Clics

Illustrating how spiritual healing helps a patient from pain and distress through to recovery, Sandy shares intriguing evidence from case studies as well as other research projects that negate the myth that energy healing is only a placebo. She offers statements from medical professionals who have witnessed the results firsthand and also details a quick technique to relieve pain that readers can apply in their own lives. Showing how spiritual healing not only led to improved outcomes for patients, but also faster recovery times and thus less time spent in hospitals, Sandy moves us one step closer to widespread acceptance for spiritual healing and energy medicine.

Stress in the DSM is referred to only in the sense of post traumatic stress disorder (PTSD). However, some research studies estimate up to two thirds of illnesses seen by general practitioners are ' stress related ' – GI problems, sleep disturbance, mental concentration, headaches, fatigue, shortness of breath, high blood pressure, dermatitis, illnesses from lowered immune system, and vague aches and pains – all can be symptoms and outcomes of the elusive stress factor. This issue of Psychiatric Clinics of North America discusses the scientific medical facets of stress, written by mental health and medical practitioners. It looks at the brain-body connection of stress – what the body does to result in stress and varying results stress
