?Higher Education in South Africa should be of considerable interest to higher education researchers outside of South Africa, as well as within, for the general and comparative assessments it makes. The South African higher education researchers included within its covers have clearly engaged with research and writing from many parts of the world, which they have then applied to make sense of their own condition.? ? Malcolm Tight Lancaster University, UK

Bringing together prominent educators and researchers, this book focuses on conceptual and methodological issues relevant to the nature of knowledge and learning. It offers a state-of-the-art theoretical understanding of epistemological beliefs from both educational and psychological perspectives. Readers discover recent advances in conceptualization and epistemological studies across diverse cultures. This is an unbeatable resource for academics and researchers alike.

Higher education can be a vital public good, providing opportunities for students, informed citizens for democracy, and knowledge to improve the human condition. Yet public investment in universities is widely being cut, often because public purposes are neglected while private benefits dominate. In this collection, international scholars confront the realities of higher education and the future of its public and private agenda. Their perspectives illuminate the trajectory of education in the twenty-first century and the continuing importance of the university's public mission. Reporting from Asia, Africa, Europe, Latin America, and North America, these scholars look at the different ways universities struggle to serve public and private agendas. Contributors examine the implications of changes in funding sources as well as amounts, different administrative and policy decisions, and the significance of various approaches to assessment and evaluation. They ask whether wider student access has in fact resulted in social mobility, whether more scientific research can be treated as an open-access resource, how changes in academic publishing change access to knowledge, and whether universities get full value from research sold to private corporations. At the same time, these chapters capture the confusion in the university sector over explaining academic work to a broader public and prioritizing its multiple purposes. Authors examine these practical challenges and the implications of different approaches in different contexts.

Communication Yearbook 31 continues the tradition of publishing rich, state-of-the-discipline literature reviews. This volume offers insightful descriptions of research as well as reflections on the implications of these findings for other areas of the discipline. Editor Christina S. Beck presents a diverse, international selection of articles that highlight empirical and theoretical intersections in the communication discipline. Chapters in this volume include reviews of literature on silence in dispute, communicating about cancer, interpersonal conflict, trauma, identity, work relationships, communication and community, and media content diversity. This volume will be valuable to scholars across the communication discipline. Communication Yearbook 31 will be particularly beneficial to scholars in the areas of interpersonal, health, organizational, family, and intercultural communication; language and social interaction, and media studies.
